

Brembo NAO Ceramic Brake Pads.

The Perfect Partner

Minimised noise and vibration for maximum driving comfort are guaranteed by a superior friction material combined with multi-layer shims.

OE Quality

Different car applications need to have different friction material to ensure the best performance and comfort. More than 100 different types of friction material, a result of the ongoing research and the extensive lab and road testing.

Performance

Minimal braking space in all conditions. Maximum driving comfort. Maximum silence.

Range

More than 1400 part numbers, for over 96% of the AU/NZ car parc. Available in Low-Met, NAO & Xtra ranges.

Homologation and Marking

Immediate identification of the pad. ECE-R90 Homologated.

Easy Installation

Wide range of accessories and fitting kits for easy and problem-free installation.
