Brembo Brake Discs

96% Car Parc Coverage in Australian Market

UV coating

UV coating technology, developed in collaboration with car manufacturers, which guarantees superior corrosion resistance and full protection of the disc.

Performance

Exclusive pillar venting system, patented by Brembo, improves the cooling capacity and increases resistance to thermal cracks of the disc by over 40%.

Comfort

HC

High Carbon: cast iron brake discs with higher carbon content to minimise vibration and noise, maximise performance and increase driving comfort.

OE Pedigree

OE supplier

Premium Range: composite and floating discs for prestigious cars, with excellent performance achieved through special materials and solution.
